

Model CDBM Series

Compression Load Cell
Specially Designed
For Truck Scales (5t ~ 15t)

Specially designed for midium size truck scales in harsh environments.

The effective integration of the CDBM is that mount and double ended shear beam load cell eliminates the need for troublesome check roads, links, expansion assemblies and other peripheral hardware.

The unique spherical ball point loading mechanism makes lateral movement of the assembly possible, while controlled floating of the scale deck is allowed.

- High overload tolerance
- Self centering design
- Electroless nickel plated alloy tool steel
- 0.03% accuracy
- Protection against harsh environment
